“EYE SAFETY!”

Source: California State Compensation Insurance / Safety Newsletters

Over 90% of all eye injuries can be prevented by following established safety guidelines. Use the appropriate protective eyewear for the tasks you perform – and learn to recognize the most common eye hazards.

PROTECT YOUR EYES!

- COMMON HAZARDS include flying particles, dusts, sparks, fumes, splashes
- BE ALERT to the hazards present at your worksite
- Wear appropriate protective eyewear identified for your assignment and remember, regular eyeglasses or contact lenses will NOT protect you from eye hazards
- Make sure your protective eyewear fits properly and is clean and in good condition before and after each use
- Replace faulty eyewear immediately
- Follow established safety guidelines
- Learn the basics of first-aid for eye injuries
- Know where all eyewash stations and emergency equipment are located
- In the event of an eye injury get medical attention immediately – and contact us immediately

Take CARE of your EYES

- Get your eyes tested
- Wear the right eye protection
- Your supervisor will assist you in identifying the required and proper protection
